

Southern New England Scrollers August 12, 2018 meeting notes

Nine (9) people attended our meeting in spite of the warm, humid conditions. The business meeting was very short. We talked about getting parts for saws (and other pieces of woodworking equipment) that were no longer in production. We also discussed possible club activities for future meetings,; including You tube videos, demonstrations, etc. I would really appreciate more input from club members concerning what you are looking for in any of our club meeting. ANY INPUT IS SINCERELY APPRECIATED!

We also discussed blades, and I am very impressed with the results of my trial use of the Pegas blades - I am a convert - I will be a Pegas user from now on! (once my Flying Dutchman blades are gone).

As usual, we had a great show & tell portion of the meeting. This is always the most interesting and fun portion of our meeting. Please go to the website (and You Tube) to see the projects brought to the meeting. I will summarize the projects here:

Arnie - wooden vases from a Steve Good design pamphlet.

Mourille - a large number (too many to count quickly) of small cars destined to be give-aways at the Woodworking Show in January. Thank you Mourille! Time for me to make some.

John - brought a cross he had cut from PVC for gravesite at the local cemetery.

Terrri - brought a pirate with a great finish job!

Don - brought a bird feeder intarsia plaque. Beautiful!

Dave M. brought a serving tray and a "Dad's Shop sign. Both projects were beautiful.

Bill B. brought a ping pong ball shooter, a rabbit on wheels, man on a tricycle, and 2 different bicyclists in shadow boxes. Bill has obviously been busy!

Gene M. brought 3 beautiful cheese boards and/or butcher block boards, all made from recycled wood. As usual, the quality of his projects is superior.

Max S. brought his recording equipment and recorded each person's portion of our show & tell. Check it out on you tube! Thank you Max!

Meeting closed at 2:30.

Our next meeting is October 14, 2018, and Mourille will be demonstrating compound cut Christmas ornaments. Mark your calendar and be there!
